### BLIND FRYAR GOING TO THE COUNTY FARM

Threatened to Kill His Sick Wife in  
a Drunken Rage Last Evening—  
Has Imposed on City Long  
Enough.

Undesirable citizen Fred Fryar, a blind man who has been giving the community and its several organizations plenty of trouble since he came here from Tomahawk several years ago, was last night arrested by City Marshal Appleby and Officer John Brown at the little shack on the Kennedy farm, not far from the Blind Institute, on a complaint telephoned in by Mrs. Kennedy that while in a fit of drunken rage he had threatened to kill his wife, now confined to her bed with pneumonia. The blind man tried to offer resistance but he was promptly jerked into the patrol wagon and hustled off to the lock-up. An effort will be made this afternoon to send him to the county farm for life. Fryar pretends to have been a student at the Blind Institute but as a matter of fact he was there only a short time during Supt. Pease's administration. At the opening of the next administration he was admitted to the school but expelled a few months later for drunkenness and incontinence. Some years thereafter he went to the superintendent with an order from the county judge of Juneau county that he head officer of the school refused to recognize the order and paid the man's expenses home, believing him to be a charge of Juneau and not Rock county. He was a constant annoyance during the following administrations. Some two years ago he married a woman who could see and shortly thereafter appeared upon the scene as a street beggar. He has repeatedly imposed upon the Associated Charities, and the good nature of a public prone to sympathize with the unfortunate.

### DEJONGH IS UP TO OLD TRICKS AGAIN

Bogus Checks on Unsuspecting  
Freepoint Saloonkeepers.

W. J. DeJongh, the alleged floor exiler who pleading guilty to a charge of embezzlement was sentenced to one year in the state's prison at Waupun by Judge Field at his old tricks again. After six months of his sentence and expired he was paroled in October and last Monday night he spent in Rockford at the home of a friend. A message was received by the Rockford police that he was out on parole and that his apprehension was desired. They immediately got busy, but he had already left for Freepoint, so the Freepoint police were notified but to no purpose. The Freepoint police detained a suspect answering to his description to some extent but later let him go as the identification was not complete enough. In the meantime DeJongh had cashed two bogus checks, amounting together to \$35.50, and had departed. His victims were two Freepoint saloonkeepers.

After hanging around all day Tuesday he approached the saloonkeepers in the evening and got the money on his checks. He also advertised for young men to solicit and after hiring three fellows, two from Janesville, he went off and left them stranded without a cent.

LOCAL FRIENDS OF  
ANTI-PROHIBITION

Are Meeting Here Today to Elect Delegates to State Convention in Milwaukee on Jan. 14 and 15.  
At the call of Secretary Charles E. Hermann, members of the Janesville National Anti-Prohibition League met in special session at their hall on North River street this afternoon to elect delegates to the state convention of the "Anti-Prohibition League" which will be held in Milwaukee on Jan. 14 and 15. Thomas F. McKelvie of this city is vice president of the state organization. The highway gained by the prohibition movement throughout the country and the prospect that the next legislature may to some extent fall in line with the law-makers in other states and enact legislation hostile to the liquor interests, are said to have awakened the saloon and brewery interests to the necessity of making a united stand. It is proposed to have delegates from every licensed city, county, and town, in the state.

## KICKERS' KOLUM

Editor Gazette: In your report on the proceedings of the common council in last Monday's issue my attention was attracted by the presentation of a measure whereby the City Ice company would close that part of the highway running from North Main street to the river, and lying between their icehouses at this point.  
This highway has been the means of entrance and exit of many launches for years past, and it is practically the only available place whereby they can be launched or taken out of the water.

About a year ago the council granted to them the permission to extend their icehouse, which they did, thereby averting themselves of about fifteen feet of this highway. The property lying to the north of highway is owned by the City Ice company and if their intentions are to build, it would seem that this property could be utilized for that purpose.  
In view of the fact that this is a public highway, and with due respect for the many launch-owners, I would respectfully request that the city council give this matter their serious consideration before their session of January 20th.

Very respectfully yours,  
"A LAUNCH-OWNER."

View of corner and one entrance of new House of Representatives building showing the beauty of architectural detail.

This is the new office building of the house of representatives, designed to accommodate the committee of the lower house of congress, which have heretofore been greatly handicapped in their work through lack of adequate room.

The new building is one of the most beautiful in Washington. It is directly adjacent to the national capitol and is reached by an underground tramway from the House Ex. B.

There are 221 rooms in the new house of representatives building, which will be devoted to private office use, and they will be apportioned by lot among the members of the lower house of congress. ## THE LAND OF PROMISE

In these days of meditation, when the peasant has his fancies, it is profitable, as well as consoling to survey the land in which we live, "The land of unlimited possibilities," so styled by the Manufacturers' Record.

In a recent issue, which contains some figures worth noting.

Briefly summarized, all Europe has 42,000 square miles of coal area, while the United States has 310,000 square miles. If the coal in the state of West Virginia alone could be capitalized at 10 cents a ton, it would represent a value of \$10,000,000, and the coal fields of Kentucky could duplicate this amount.

In 1896, Great Britain, Germany and France produced 25,500,000 tons of iron and steel. During the same period the output of the United States was 25,307,000 tons.

Europe has 86,000,000 spindles, and its cotton mills represent an investment of \$1,500,000,000, but the 8,000,000 bales of cotton used annually come from this country, and no other land has yet been discovered where it can be grown. Great Britain pays us \$500,000,000 a year for cotton alone.

The value of American farm property in 1906 was \$23,000,000,000 and the value of farm products in 1907 was \$7,400,000,000. This means that the per capita income of the 115,000,000 people engaged in agriculture was \$643.

The undeveloped power of our waterways far exceeds that already in use, our iron and coal industries are still in their infancy, so far as supply is concerned, and our cotton product can be doubled, when occasion demands.

We have 85,000,000 people, scattered over an area that would not be crowded with twice the number. Half our population are taxpayers, and a liberal percentage of the balance are savings bank depositors.

It is a land of great opportunities, as well as a land of promise, and the man who fails to appreciate, must be a dyspeptic or chronic bleaker.

## TAPPED WHILE YOU WAIT

"The sales of 500,000,000 pairs of shoes vanish into dust in this country every year. A few people throw their shoes away when they feel that their feet are getting too close to nature; others take them to the old cobbler around the corner and have them resoled; a few re-tap their own shoes."

"The ancient cobblers still toll away in every city and village, sitting upon the low 'seat,' protected with leathern apron and using the same old flat-faced hammer, last and awl of the first shoemakers. But modern machinery is fast driving the cobbler from his seat. Machines driven by electric motors are now being installed in repair shops and shoes are 'tapped' while you wait. The modern cobbler's shop is equipped with machines such as are used in factories and the worn shoes can be resoled in a few minutes and at considerably less cost than by the old hand method."

This little paragraph comes from the Electric News Service of Schenectady, New York, and describes but one of the many new devices in which electricity is employed. Mills and factories, dependent on water power, no longer find it necessary to locate their plants near a stream, for electric energy is successfully transmitted, and plants are now located with reference to the supply of raw

material, power being a secondary consideration.

The cotton mills of the south are in the heart of the cotton-growing district. Many of them use water power, while the stream that supplies it maybe 100 miles away.

Along the line of the New York Central road between Albany and Buffalo, is stretched a heavy copper wire, which transmits power to cities, along the route, from the great power plant at Niagara.

Heavy engines equipped with motors are used in many of the long tunnels, and at the terminal stations in many of the larger cities, thus avoiding the smoke nuisance. The following from an electrician's notebook is of interest:

"The electrical treatment of cancer by Dr. Kenting Hart of Massachusetts, France, has shown most wonderful results. The system consists of applying in a special manner the tension intermittent sparks to the cancerous growths. These are softened by the electricity and their cutting out is made most easy. At the same time the current causes all pain and makes the wounds heal with rapidity, preventing a recurrence of the growth."

"Electricity is now being largely used in the book-binding business, embossing. With the aid of the current it is possible to make all impressions a minute on the electrically heated embossing process. Electricity also heats the plates and the hand tools used in binding the leather covers."

"The Automobile Car is being built on new principles of electricity. Each motor is connected to a small block of non-conducting material, a black and white button, and a name is to be built into the buttons are pushed or pulled, recorded at the press in insulated wires."

The January number of "The Manufacturers' Record," published by the National Association of Manufacturers, contains a list of letters from prominent manufacturers on the outlook for the year. Without exception the forecast is encouraging, many will report orders already in hand.

The Los Angeles Times out paper on the Pacific coast a signal victory, after contest with all sorts of stunted and carried on.

It is estimated that labor has spent \$250,000,000 in the times, but the year is having no desire San Francisco.

The Milwaukee State temperance laws saloon in the state people of the state.

It is estimated that 134,000 unemployed men in New York about 100,000, and labor is largely represented in this class, because construction of almost all kinds is a stagnant business, except in the building of new machinery and with but little reduction, there is the scale of wages.

and hundreds of people of Janesville are familiar with them. For a time we could not get them. The easiest way to be satisfied that these curtains are very much under-priced is to look around and see what other merchants have to offer at prices as high as 60c and 60c per pair. These are the lowest prices ever made for curtains of such quality, 35 in. wide, 2 1/2 yards long, five rows of tucks, four-inch ruffles, every seam double stitched, our price, per pair, 39c

## Of Course They Said So.

"How did you happen to come to me for your dentistry," said Dr. Richards to a patient recently.

"Why, you see I'm a stranger here," said the party, "and I inquired of several people as to what dentist to go to and they all said 'Dr. Richards' if I wanted 'Painless work'."

"Of course, I didn't want to be hurt and so I came to you," said the patient.

"Well, are you sorry you came?"

"Not a bit. You never hurt me in the least."

It's worth something to have such a reputation for Painless Dentistry. If you need dentistry and wish perfect satisfaction try Dr. Richards. He "delivers the goods."

## LOAD OF FIKE NETS FOR CARP FISHERMEN

Passed Through City Today, En Route for the Haskell Farm Where Ted Carroll and His Men Are Now Operating.

Deputy Game-Warden O. W. Sholtz of Brookfield, Wis., and William Ward, the drayman, drove through the city this morning with a load of seven fike-nets and poles belonging to the carp-fishing outfit owned by Ted Carroll of Elgin, Ill. They were on their way to the Haskell farm which is located about a mile and a half up river and where Carroll is now preparing for extensive fishing operations. The Thompson Brothers of Chillicothe, Ill., and together there are about 25 nets in the river. Carroll and his men have only "drawn" once and the luck was very poor, but as their campaign in that vicinity was only started last week, they are going to keep at it and the sending for additional paraphernalia shows that they are not discouraged.

The nets and their circular iron frames are eight feet in diameter, and in order to place them it is necessary to cut two channels in the ice of about the same dimension and about eight feet apart. The "loads" to the pond nets (simple barriers of netting which steer the fish toward the "apertures" of the deep) to the little aperture which opens into the trap are about three rods in length. Working through the holes in the ice the fishermen place these and the main "corral" in position with the aid of long poles and ropes. There are about nine men in each "gang." The nets are "hauled" once a week and the game-warden is always on hand to see that catch, buthams, bass, pike, and all the other fish protected by law are put back, while only the carp, buffalo, suckers, and redbreast are relegated to the "pens." The fishermen pay the ward on \$2.50 a day and expenses and the money is turned over to the state which pays him a salary.

Warden Sholtz answers to several questions. "It is not true that the state has called a permanent halt on carp-fishing operations at Lake Koshkonong. Some of the people of Ft. Atkinson were opposed to it because they thought it interfered with their fishing and the farmers objected because they claimed the selling destroyed the wild celery, wild rice, and other duck food. They went before the Governor with their complaints and we left the lake for awhile. Our last haul was 25,000 pounds. Most people think it is a good thing to get rid of the carp. They do more harm in rooting up vegetation than the net and they destroy the spawn of game-fish. The black bass is the only fish that will fight him in protection of the spawn. As a matter of fact some of those Lake Koshkonong residents didn't like to have the game-warden around as steady visitors. The boys become run out of the lake in April and they will remove their nets before the season of launch navigation opens. Just now the market is weak so far as carp are concerned and there are three carloads in the 16-foot pens at Ft. Atkinson awaiting better conditions. Most of the catch is shipped in 15-pound boxes to New York City where a market is found among the 20,000 Jews. The buffalo fish brings the best price. The boys have from \$1,200 to \$2,000 invested in their outfit. The seine they use in the lake is half a mile long and it takes six hours to pull it in. The river seines are 600 yards long but are seldom used. There hasn't been a time for many years when gamefish were so plentiful at Lake Koshkonong as they are today and I think that justifies the crusade against the German carp and the operations which net the boys very good returns."

## OBITUARY.

Mrs. William Scarelliff  
Edgerton.—Mary Ann Grantham was born in Meltham, England, Feb. 24, 1814. She came to America in June, 1853, and was married Jan. 28, the following year, in Trinity church, Janesville, to William Scarelliff, and soon after moved to Independence, Iowa, where they resided about three years. In 1859, being recalled by the death of Mr. Scarelliff's mother, they returned to Wisconsin and settled on the homestead at Indian Ford, where they lived till 1888. Then on account of the failing health of Mr. Scarelliff they left the farm and spent a year in visiting their early homes and old friends in England. On their return they lived in Edgerton until the death of Mr. Scarelliff in February, 1903. Since then Mrs. Scarelliff has made her home most of the time with her son at Indian Ford. She passed peacefully away Jan. 3, 1908, leaving three children, John Scarelliff of Indian Ford, Mrs. Jos. Riley of Escobol, and Mrs. Geo. Wentworth of Edgerton, and one sister in England, to mourn her loss.

With the death of Mrs. Scarelliff another of the pioneer women of Rock county has passed beyond; one who came to make a home in a new country, who bore heroically all the discomforts and privations of pioneer life, helping as she did so many others to make from almost a wilderness the prosperous country of today. For the past two years she was an invalid, longing yet patiently waiting to rejoin the loved ones gone before. The funeral services were held Monday afternoon, Jan. 5, at the home of John Scarelliff of Indian Ford, conducted by Rev. F. C. Richardson, after which the remains were tenderly laid to rest in Fasset cemetery.

## WHITELAW REID.

Ambassador Whitelaw Reid, who during his sojourn in England has made a study of everything English, with the idea of comparing the English and American systems, gave a very practical talk before the New York State Teachers' association at Syracuse, N. Y., on "Some Points of Difference Between the Educational System of the Two Great English Speaking Countries." He said in part as follows:

"I cannot help feeling," said he, "that we might profitably take a hint from the old country. Whatever else we may say about the English schools, they do turn out well behaved orderly boys and girls with an instinc-

tive sense of obedience to law.

"If the interest of the republic requires that every child be compelled to learn to read his laws, does not the same interest as imperatively require that every child be taught the absolute necessity of respect for those laws? Does not the interest of the republic further demand that the republicans shall have some idea of our old beliefs on religion?"

"Our English schools, according to our ideas, go too far in teaching creeds, may we not be going too far the other way in excluding altogether or in giving too little space to teaching unsectarian religion and morals? In London the policeman often controls the biggest and angriest crowd by lifting his hand in cases where the New York policeman has to lift his club. Is it improbable that early training had something to do with this?"

## WEDDING WAS ONLY A JOKE MALONEY TAKES COURT TO ANNUL DAUGHTER'S MARRIAGE.

Fictitious Names Were Given and Helen Never Lived with the New York Broker.

New York, Jan. 10.—Martin Maloney of Philadelphia made known through a formal statement Thursday night that proceedings had been instituted to obtain a court judgment declaring that there was no marriage between his daughter, Helen Eugene, and Arthur Herbert Osborn, the young New York broker, who, according to the county records, were technically united in matrimony at Mamaroneck December 28, 1905.

Petitions names were given by the parties to the ceremony and the two never lived together. Mr. Maloney does not go into details in his announcement, but it is understood that the present court action is based upon the admissions of the young people that the idea of their union was conceived in a spirit of fun and that the marriage was a mockery.

Subsequent to the Mamaroneck ceremony Miss Maloney accepted the attentions of Samuel Clarkson, a young Englishman who had been a guest at the Maloney home. On October 1 last Clarkson and Miss Maloney simultaneously dropped out of sight, and were next heard from in London where Miss Maloney was found living at a hotel and Clarkson in bachelor quarters. Following the disappearance of the two and while frantic efforts to locate them were being made by the Maloney family, the situation was further complicated by the published claim of Osborn that he was the husband of the missing daughter.

Grace Ferrall turned and looked at the girl beside her, laughing outright. "Oh, Howard doesn't do mysterious financial things. Besides that, if Howard is in that thing no doubt I am too. So your idea of a young man in a very safe company," said Sylvia coolly, but there was a good deal of color in her cheeks, and she knew it and pulled her big motor veil across her face, fastening it under her chin, all of which amused Grace Ferrall infinitely until the subtle significance of the girl's mental processes struck her, sobering her own thoughts. Sylvia, too, had grown serious in her preoccupation, and the parties-doux terminated a few minutes later in a dust of silence over the tenebris in the gunroom.

A few moments later Sylvia, glancing over her shoulder, noticed that a fine misty drizzle had clouded the elements. That meant that her usual evening stroll on the cliffs with Quarrier before dressing for dinner was off. And she drew a little breath of unconscious relief as Marion Page walked in, her light, woolen shooting jacket, her hat, shoes and the barrels of the fowling piece tucked under her left arm, all glimmering frostily with powdered raindrops.

She said something to Grace Ferrall about the mist promising good point shooting in the morning, took the order book from a servant, jotted down her request to be called an hour before sunrise, filled in the gunroom records with her score—the species and number bagged and the number of shells used—and, accepting the tea offered, drew out a tiny cigarette case of sweet bay wood heavily crusted with rose gold.

"With whom were you shooting?" asked Grace, as Marion dropped one well slung leg over the other and wreathed her delicately tanned features in smiles.

"Stephen Steward and Billy. They're at it yet, but I had some letters to write." She glanced leisurely at Sylvia and touched the ash tray with the whitening end of her cigarette. "That dog you let Mr. Steward have is a good one. I'm taking him to Jersey next week for the cock shooting."

Sylvia returned her calm gaze blankly.

An unaccountable and disagreeable shock had passed through her. "My North Carolina pointers are useless for close work," observed Marion.

Marion Page.

Indifferently, and she leaned back, watching the blue smoke curling upward from her cigarette.

Sylvia, distant, but with downcast eyes on the under the fringed lid, was thinking of the cheek Steward had given her for Sagamore. The transaction for her had been a business one on the surface only. She had never meant to use the check. She had laid it away among a few letters, roles, pleasant souvenirs of the summer. To her the affair had been nothing but a delicate hint of intimacy—the delight he was to take in something that had once been hers had given her a faint taste of the pleasure of according pleasure to a man. And this is what he had done!

## ACT OF SCHMITZ WAS NOT A CRIME

APPELLATE COURT FINDS HIS INDICTMENT INVALID.

RUEF ALSO TO BENEFIT

Former Mayor and Boss of France Finally Win in the French Restaurant Extortion Cases.

San Francisco, Jan. 10.—The district court of appeals handed down a decision Thursday settling aside the judgment in the case of former Mayor Eugene R. Schmitz, convicted of extortion in the French restaurant case. Abe Ruef also benefits by the ruling of the upper court, for, according to its decision, he pleaded guilty to an act that was no offense against the laws of the state.

According to the appellate judges the compelling of French restaurants to pay "foes" to Abe Ruef was not a crime, even though Ruef divided the "foes" with the mayor.

After discussing the point the court reversed the judgment against Schmitz on the ground that no act constituting a crime had been proved against him. Abe Ruef, who pleaded guilty to extorting money from the French restaurants, is therefore equally guiltless.

In passing upon the legality of the indictment the appellate court said:

"The indictment is claimed to be invalid for two reasons: First, that it does not allege any threat to injure property, and, second, it does not allege that the threat was to do an unlawful injury."

"The gist of that portion of the decision relating to the allegation that there was no threat to injure property is contained in the following sentence:

"There is no allegation as to any threat to injure any business in direct terms, but only the threat to prevent the parties from obtaining a license to sell liquor." A license to sell liquor is not property in the ordinary sense of the word, says the court.

Commenting on the second contention of Schmitz's attorneys that there was no threat to do unlawful injury the court declares:

"We are clearly of the opinion that the indictment is insufficient, because it does not allege nor show that the specific injury threatened was an unlawful injury." It is not an unlawful act, reasons the court, to threaten to hold up the license of the restaurant keepers or actually to do so.

Entitled to Release on Bail.

The decision will stop the French restaurant cases, and pending charges of extortion against Schmitz and Ruef must be dismissed. Both are now entitled to release on bail. If they obtain the necessary bondmen they can remain at liberty until such time as a jury finds them guilty on one of the indictments charging them with receiving bribes from corporations.

Owing to the number of cases against them the bail, figured at \$10,000 a case, would reach an enormous figure. Can't Get Out for 60 Days.

Schmitz and Ruef cannot take advantage of the decision for 60 days. The prosecution has 20 days in which to ask for a rehearing. Then the appellate court will have ten days to consider the application. When that is done the prosecution will go through the same procedure in the supreme court, which will take the same length of time. Consequently Schmitz and Ruef will still be kept in the county jail for two months at least.

The news of the decision of the appellate court spread rapidly over the city, causing consternation in some quarters and delight in others.

EIGHTY FAMILIES EVICTED.

Rent War in New York Thought Near Settlement.

New York, Jan. 10.—Eighty evictions of East side rent strikers took place Thursday and Monroe street was filled with a litter of displaced furnishings. It is believed that the strike situation is now nearer a solution and claims of victory are being made by both sides. The indications are that the honors are about even, for although most of the tenants paid the rents asked when they saw that eviction was inevitable if they longer refused, others obtained concessions from the landlords varying from one to two dollars a month.

For World's Largest Elevator.

Superior, Wis., Jan. 10.—The Great Northern railroad has received estimates from contractors on the construction of the steel elevator to replace elevator "A," which burned in November. Specifications call for the largest single grain house in the world, surpassing the \$3,000,000 elevator "B" of the same line here. The new house is to be done by September 1, and it is estimated the cost will be about \$1,250,000.

Chicago Pioneer Dead.

Chicago, Jan. 10.—Austin O. Sexton, once active in Chicago in state and local politics, died at the home of his daughter, Mrs. John Fitzgerald, at Hammond, Ind., Thursday, after a week's illness. He was born on Aug. 15, 1852, in a house his father, a Chicago pioneer, had built at Michigan street and La Salle avenue.

Diamond Ring Not Necessary.

Nine out of ten happy marriages began without diamond engagement rings. There is no world-old superstition about the diamond.

MRS. CARTER-PAYNE.

New York, Jan. 8.—Judge Hough of the United States district court handed down a decision holding Mrs. Carter-Payne, the actress, now in bankruptcy, has the right to the possession of the property, costumes, etc., of the "Zaza" and "Du Barry" productions and to the contract entered into between the actress and Thomas R. Hart regarding the plays "Fodora" and "La Tosca." Ezra P. Prentice, a receiver, appointed on November 19 last, was ordered to relinquish whatever theatrical property of Mrs. Payne's he holds.

The receiver had averred that the

actress' only asset was her ability to act in the plays mentioned that, therefore, he had a right to compel her to continue to play for the benefit of her creditors. The situation, however, was complicated by the fact that Mrs. Carter-Payne did not lay claim to the property rights of "Zaza" and "Du Barry," both of which were lent gratis to her by David Belasco.

Mrs. Carter-Payne tacitly admitted, however, that she owned the plays by agreeing to turn over to the receivers all receipts therefrom except \$1200 a week, to be retained by her as salary. She did this on December 4 last in Syracuse to prevent the company from being disbanded.

THE BUSY MAN'S CORNER.

The courthouse at Calhoun, Ky., was destroyed by fire. All court records for Meigs county were burned.

Vernon L. Nettleton, of Coldwater, Mich., gashed his sister's throat with a carving knife and then killed himself.

W. B. Thomas was elected president of the American Sugar Refining company to succeed the late H. O. Havemeyer.

William Shambarger perished in a fire that partly destroyed the storehouse and shops of the Lake Shore road at Elkhart, Ind.

Urban Amey, captain of last year's football team at Kansas university, committed suicide at Lawrence, Kan., by jumping from the dome of Frazer hall.

Christopher H. Connor, former city comptroller of La Crosse, Wis., and one of the best-known Democratic politicians in western Wisconsin, died at Spokane.

A stretch of beach 300 feet long at Oregon Inlet, N. C., was washed away during a storm, carrying with it the land end of the government cable to Hatteras station.

Five men were injured, one probably fatally, and the lives of 50 passengers endangered by a terrible head-on collision on the Chicago, Milwaukee & St. Paul railway in Chicago.

Chinese students educated in America have taken precedence over those educated in Europe and in Japan, according to advices received at the state department from American Consul General Bergdolt at Canton, China.

## FACTS ABOUT NEW THEORY SECURED BY INTERVIEWS

People Tell the Reason for Their Faith in Cooper's Belief.

An article from the Nashville, Tenn., Tanager, published during L. T. Cooper's visit to that city, throws some light on the remarkable success of the young man's theories and medicines in various cities visited by him during the past year. The article is as follows:

"In view of the enormous sale of Cooper's preparations now going on in this city and the intense interest which Mr. Cooper has stirred up since his arrival, a representative of the Tanager spent Thursday afternoon at the young man's headquarters, watching the swarm of humanity come and go.

"During the afternoon the reporter interviewed many of the callers and obtained statements from all who cared to give them as to their experience with Cooper and his preparations.

"The following are selected from those statements as being typical of the general expression of the people here:

"Mr. D. B. Lanier, living at 1221 North Fourth avenue, when interviewed, said: 'I have been troubled with my stomach for the past two years, and have had rheumatism for more than five years. Sometimes I could not walk, and there were times when I could not even move in bed. Hard knots would form on my muscles, which caused me intense pain. Gas formed on my stomach after eating, which gave me much pain and distress, and often I was restless and tossed all night, losing much sleep and rest.

"Hearing of Mr. Cooper and the great work his medicine was accom-

plishing for others, I decided to try it. I have taken it about two weeks, and find myself in a greatly improved condition. My stomach is in good shape, and does not trouble me at all. My rheumatism has nearly disappeared, and I expect to resume work shortly, for the first time in twelve months. Mr. Cooper certainly has a wonderful medicine, and I am grateful for what it has done for me.

"Another caller was Mrs. T. J. Smith, of 605 Hudson street. She said: 'I have been a sufferer from bladder and kidney trouble for twenty-five years. In that time I have tried many prescriptions and various kinds of medicine, but received little or no benefit from them. I seldom had a sound night's sleep, my rest being broken at intervals throughout the night. I had pains in my back and burning sensations.

"I heard so much of Mr. Cooper that I came to the conclusion he might be able to afford me some relief. I have now been taking the medicine about a week, and feel better in every way. The pain has disappeared, and I have no distress whatever. I have come here today to express my appreciation to Mr. Cooper for his wonderful medicine and what it has done in my case. I will take pleasure in recommending it to others.

"In spite of assertions by various physicians that Cooper is a fad who will soon die out, the young man seems to be gaining even greater headway as his visit draws to a close."

The agency for Cooper's celebrated medicine has been given to us. We are making a fine record with them.

## CATARRH A SERIOUS FAR-REACHING BLOOD DISORDER

Even in its early stages Catarrh is almost intolerable, caused by the stuffy feeling in the nose, the buzzing noises in the ears, the continual "hawking and spitting," difficult breathing, etc. But when the blood becomes thoroughly polluted from the catarrhal matter, the inflammation extends to the bronchial tubes, causing hoarseness, and often an aggravating cough; the stomach is affected, resulting in dyspepsia, loss of appetite and strength, and gradually all the mucous membranes of the body become diseased and the system upset and deranged. Frequently the kidneys and bladder are attacked, and the constant passage of impure blood through the system, diseases these important members, and Catarrh terminates in Consumption. Catarrh is a deep-seated blood disease, and must be treated constitutionally. For it is beyond the reach of local treatment. S. S. S. cures Catarrh by cleansing the blood of all the impure catarrhal matter and at the same time building up the entire system. It goes down and attacks the disease at its head, in the circulation, and removes every trace of the impurity that is causing the trouble. Then as rich, pure blood circulates through the body, the inflamed membranes commence to heal, the flamed membranes grow less and finally mucous discharges grow less and disgusting, and all the disagreeable and disgusting symptoms of Catarrh disappear. S. S. S. has symptoms of Catarrh disappear. S. S. S. has no equal as a cure for this disease. It refines and purifies the entire circulation and repairs the damage done by Catarrh. Special book on Catarrh and any medical advice free. THE SWIFT SPECIFIC CO., ATLANTA, GA.
